Mayor and Councillors Returned Unopposed

Six Candidates Nominated for office of School Trustee

Mayor Chambers and Councillors F. H. Bulgeon, J. Fleury and C. E. Reiber were returned unopposed when nominations were received on Monday last, they being the only candidates nominated.

For school trustees six candidates were nominated to fill three positions and the election will take place next Monday.

The retiring trustees were Mr. J. V. Berscht, Dr. Evans, and Mr. J. W. Halton.

The following nomination papers were handed in.

C. H. ADSHEAD nominated by W. T. Pitt, F. Kaufman, D. A. Edwards, Geo. Watson, W. J. Hillyard, H. C. Liesemer, H. M. Reiber, H. Shultz

E. RDMAN BUHR nominated by Ivan Weber, T. DeWitt, Fred Moyle, W. W. Gillrie, George Watson, W. J. Hillyard, H. W. Chambers, H. C. Liesemer, H. M. Reiber, H. Hawkes, H. Shultz.

JAMES CAITHNESS nominated by W. M. Smith, W. T. Pitt, D. A. Edwards, W. J. Hillyard, H. C. Liesemer, H. Hawkes, H. Shultz, T. A. Duncan

D. R. J. L. CLARKE nominated by A. Brusso, F. Moyle, E. G. Ranton, D. A. Edwards, Geo. Watson, W. J. Hillyard, H. W. Chambers, H. Hawkes, H. Shultz, T. A. Duncan

DR. W. G. EVANS nominated by A. G. Studer, John E. Liesemer

JOHN E. LIESEMER nominated by A. G. Studer, W. G. Evans

On Wednesday morning Mr. C. H. Adshead withdrew his name as a candidate for school trustee which will leave five candidates in the field.

Car Window Broken and Goods Stolen

A party of Melvin folks drove to Calgary on Saturday and parked their car in a department store lot. After making their purchases they left them in the car, but on their return found that the car window had been cut out and that the goods were missing.

Take Vote on Poultry Pool.

Active organization for taking the vote of Alberta poultry producers for or against the proposed poultry marketing scheme started Monday according to an announcement made by E. W. Brunsden, secretary of the Alberta Egg and Poultry Producers' Association.

A series of meetings are being held in this district, particulars of which will be found in our advertising columns.

The ballot, which will be taken by mail, will be open to all producers with flocks of 25 or over, and will be concluded by February 23rd. Ask your local postmaster for particulars.

Five Rinks Go To Olds Bonspiel.

The Olds bonspiel opened on Wednesday morning early and five rinks from Didsbury have entered in the 'spiel. Four events will be run off.

Didsbury rinks are:

Julien, skip; Russell Berscht, E. V. Woodlock, Howard Halliday

Dave Edwards, skip; Johnson, C. E. Reiber, McFarquhar.

Dr. Clarke, skip; Fleury, Jack Caithness, Wallace.

Ward Wyman, skip; Bellamy, T. Wyman, Frank Hesselton.

Thank You!

We wish to thank the ratepayers of the Town of Didsbury for their expression of confidence in returning us unopposed to the offices of Mayor and Councillors for the next two-year term.

We can assure you that we shall work for the best interests of the town in the future, as we have done in the past:

H. W. Chambers
F. H. Bulgeon
J. H. Fleury
C. E. Reiber

Will Sponsor Moving Picture

The Ladies Aid of the Evangelical Church are sponsoring an educational moving picture given by Rev. C. Rogers of Carstairs, in the basement of the Evangelical Church on Tuesday, February 19th at 8 o'clock. Admission 25c and 15c.

The picture is entitled, "The Little White Girl and the Rule of Reason."

LOCAL & GENERAL

Fresh Supply—Looseleaf Pads for map-drawing, etc., etc.—5c. Each

Mr. Spence spent a few days in Calgary this week.

Mrs. Bert Fisher is spending a short time at Innisfail.

Rae Lantz has taken over the delivery of express from the local depot.

Mr. Barrow Gay is attending the Ford Service School in Calgary.

Miss Ruby Farrell of Edmonton is visiting with her sister Mrs. Dr. Clarke for a few days.

Miss Mildred Still of Killam, Alta., was a visitor with Miss Ruth Thomas for a few days.

Mr. Eddie Clemens of Calgary was visiting his parents and friends for a few days this week.

Mr. J. Eubank this week shipped two carloads of cattle to Montreal for the export market.

Mrs. Nyle Hunsperger visited with Mrs. Archie Boyce at Carstairs on Monday.

Mr. Eric Schwesinger is attending the Technical School in Calgary this week, where he will polish up on his knowledge of the Ford V8.

Mr. Samuel Thomas, violinist, is spending a couple of weeks in Olds rehearsing classical music with Mr. Stevens, violinist.

Mr. Barney Klassen attended a conference of managers of Builders' Hardware Stores Ltd held in Calgary this week.

A number of local people intend to attend the Oxford Group house party to be held in Calgary from Friday to Sunday.

Jack Becker left Sunda, for Calgary where he will take a 3-weeks' course in electric welding at the Technical School.

An interesting lecture on "Technocracy" was given Monday evening at the Opera House on Monday evening when Mr. McRae Newman, field secretary for Western Canada spoke. His audience was keenly interested throughout the lecture and the question hour brought out numerous questions.

The W. C. T. U. will meet at the home of Mrs. J. V. Berscht, Thursday, February 14 at 3 p.m., when Mrs. J. R. Cunningham will give the topic of "Early Crusaders." A Frances E. Willard Memorial Day, and World Missionary Day will be observed. Visitors will be welcome at this meeting. A missionary offering will be taken.

Death Calls

Mr. Wm. Rupp

With the passing of Mr. William Rupp who died on Friday last, Didsbury lost one of the most public spirited of its pioneers.

He came to Didsbury in 1901 when the town was just commencing to build and from his arrival he was connected with almost every movement for the good of the town and district.

He was a member of the first Didsbury School Board and served as a member for eighteen consecutive years. He was an earlier member of Local Improvement District board and later served on the Municipal Council. He was also one of the founders of the Agricultural Society and served on the board of directors since its formation in 1903.

He was much interested in church work and was one of the leaders in organizing and building the Zion Evangelical Church here, a member of the first board and has been a teacher in the Sunday School continuously to the time of his death.

He was a cheery disposition and he had a pleasant greeting for all he met. He was a grand old man and he served his town and district well.

Born at Zorra, Ontario, in February, 1856. Mr. Rupp lived and farmed at New Hamburg, Ontario, for a number of years. He was married in 1886 to Miss Florina Siebert and in 1901 moved to Didsbury, where he settled with his family on a farm southeast of town.

Funeral services were held Monday afternoon from Zion Evangelical church, with Rev. H. J. Wood, assisted by F. S. Spies, in charge. The local schools were closed for the half-day, and never in local history has there been such a large funeral.

Besides his widow nine children survive: Mrs. H. C. Renzie, Mrs. John Deadrick, Mrs. Tom Morris, Miss Sevilla and Miss Iva, all of Didsbury; Mrs. Glen Lewis, Clareholm; Levi at Oakland, California; and James and Oscar at home.

NOTICE OF POLL

DIDS BUR Y SCHOOL DISTRICT No. 652

ELECTION OF SCHOOL TRUSTEES

Public Notice is hereby given that an Election will be held for office of School Trustees of Didsbury School District No. 652 for the years 1935 and 1936 and that the polling will take place on Monday, the 11th day of February, 1935, at the following place, at the office of the Secretary-Treasurer of the Town of Didsbury, and that I will at the said office on Monday, the 11th day of February, 1935, at 7:15 o'clock in the afternoon, sum up the votes and declare the result of the election.

GIVEN under my hand at Didsbury, Alberta, this 4th day of February, 1935.

W. A. Austin, Returning Officer

Things To Remember

The local chapter of the Eastern Star will give a military whist drive in the Masonic Hall tonight (Thursday). Everybody invited.

The annual St. Valentine Dance under the auspices of the Canadian Legion will be held in the Opera House on Friday, February 15th. Novelty dances and prizes, old and new dances, with Halliday's Rhythm Band. Admission 75c couple, and extra lady 25c.

Ye Olde Time Dance, with Sir Hopkin's Olde Time Radio Orchestra, on Tuesday, February 22nd in the Opera House. Proceeds in aid of the Didsbury General Hospital.

Boys' Band Concert, Feb. 22nd, Didsbury Opera House.

Mrs. W. W. Rogers of Calgary, lady exponent of the Social Credit system, will speak on that subject at the Opera House tomorrow evening (Friday). Everybody welcome—especially the ladies. Arrangements are

The One Family Spirit

Listening, in the early hours of Christmas morning, to the Empire-wide broadcast, which was climaxed by King George's personally voiced message to all his subjects everywhere, one could not fail to be again impressed with the marvel of radio, and to realize how it has shattered the handicap of distance, and made the most remote portions of the globe the near neighbors of equally remote parts thousands of miles away. The greatest natural barriers of oceans, ranges of mountains, whole continents, tropic heat and arctic cold, all are surmounted in a split second of time.

In a space of less than five minutes Christmas bells were heard ringing in Canada, India, New Zealand and England, to be followed by the voices of hardy fishermen on the Atlantic coast of Canada and the island of Tasmania, of lumbermen in the northern wilds of Quebec, of tea planters in Ceylon and wheat growers in other parts of the Empire, of Indian soldiers on guard in the Khyber Pass, or a guard on the great bridge at Sydney, New South Wales, while intermingled came cheers from 10,000 throats at a hockey match in Toronto, the clamor of 8,000 natives in the heart of Africa, the shrill cries of excitement of a children's skating party in Winnipeg, or the sweet voices of a choir somewhere in rural England.

Not from populous centres alone, but from isolated posts where men and women of Britain and of British Dominions and colonies are daily "carrying on" their many and various tasks, came Christmas greetings, the one to the other, and a brief glimpse of how each and all are keeping alive and observing the spirit and traditions of Christmas. It was an interesting and inspiring hour.

But it is to the personal message of His Majesty to which attention may well be directed in these early days of the new year of 1935. Referring to the fact that Christmas day, with its hallowed memories, is the festival of a family, the King, with that vision and practical statesmanship which has characterized him throughout his reign of almost a quarter of a century, said: "I would like to think that you who are listening to me now, in whatever part of the world you may be, and all the peoples of this realm and empire, are bound to me and to one another, by the spirit of one great family." And then His Majesty added these significant words: "My desire and hope is that the same spirit may become ever stronger in its hold and wider in its range. The world is still restless and troubled. The clouds are lifting but we have still our own anxieties to meet. I am convinced that if we meet them in the spirit of one family we shall overcome them, for then private and party interests will be controlled by care for the whole community."

All Christendom hails Christmas as their own, their most sacred day. On this one day at least all men and women realize in greater or less degree that they are all members of one great family. They may live in different climes, speak different languages, even worship at different altars, with varying forms of religious observance—but as members of one great human family they observe the world's greatest festival in commemoration of the most momentous event in the history of the world.

And King George, with unerring insight, sees and tells the whole world of mankind that if they will but face their anxieties and their difficulties, not as people of alien races and differing nationalities, but as members of one family, and in the spirit which the family relationship brings, then they can and will overcome all difficulties no matter what they may be.

It is the spirit of the one family that alone will ultimately usher in that peace on earth, goodwill toward men which is the very essence of the spirit of Christmas. It is the spirit of the one family which will solve our financial and economic and social problems and troubles, because the family spirit is incompatible with personal selfishness, private greed, and corporation, community or national oppression.

May the spirit of the one family be the impelling motive directing the lives, not only of the peoples of the British Commonwealth of Nations, but of all nations, to a far greater extent than ever before during this new year of grace.

Barley Prices High

End Of Prohibition In United States Results In Demand For This Grain

End of prohibition in the United States has brought a measure of prosperity to some Manitoba farmers and to many in northern areas of Saskatchewan and Alberta, and resulted in a paradox previously almost unknown in the grain trade. Barley to-day is worth more than Canada's finest wheat.

Two years ago barley was cheaper than fuel.

The picture has changed. Barley prices have risen and farmers are relying upon it more than upon wheat to pull them out of the depression. Thirsty Americans have created a demand for barley and Canada in the five months of the current crop season has exported more than in the entire crop year of 1932-33.

On December 22, 1932, the best feed barley, 3 C.W., brought only 13 cents per bushel, net, to the farmer, based on an average freight rate of 10 cents per bushel.

Feed barley sold at the end of the year at 41½ cents a bushel and the malting variety at 61 cents. The price of No. 1 northern wheat, second only to No. 1 hard wheat in quality, was 58½ cents, based on the average freight rate of wheat of 13.2 cents per bushel.

The grand championship carload of sheep at the Chicago exhibition shown by Mr. C. J. Brodie of Stouffville, Ont., was sold at \$18.50 per cwt. the highest price since 1930.

FROM GIRL TO WOMAN

Mrs. N. Varey of 47 Burton St., Woodstock, Ont., said: "When I was growing into womanhood I suffered terrible pain periodically. I would have to stay in bed for several days. All this misery was soon corrected after taking Dr. Pierce's favorite Prescription."

All druggists. New size, tablets 50 cts., Small \$1.00. Large size, \$1.35. Write Dr. Pierce's Clinic, Buffalo, N.Y., for free medical advice.

Escapes Taxation

Father Of The Dionne Quintuplets Has Many Exemptions

When Oliva Dionne of Callander, Ont.—the forgotten man of quintuplet fame—makes out his income tax papers next year, he will be able to add \$2,000 to his exemptions list. Each of his five little daughters is worth \$400 as an exemption under the federal income tax. However, it is improbable that Dionne will be bothered by income tax because his wife and 10 children bring his exemptions to \$6,000 and that is more than his farm produces in many years.

"I don't think Dionne will come under my department until those children go on exhibition," an income tax official said recently. "And then, the income probably will go to the children themselves under a trust agreement and I would tax them, not the parents."

University Scholarships

Another Coach Model-Building Competition For Next Year

Two four-year university scholarships valued at \$5,000 each, have been announced for the 1935 Guild competition by R. S. McLaughlin, president, Fisher Body Craftsman's Guild, Canadian section.

This Dominion-wide Napoleonic coach model-building competition, sponsored by General Motors of Canada, Limited, enters its fourth year with the addition of cash awards to craftsmen in three districts amounting to \$1,200.

Midnight, July 31, 1935, will be the closing date, at which time all coaches entered for competition must be shipped to one central judging point. This final date gives all entrants a month free from school in which to finish, check and re-check their 1935 coaches.

The creatures in the Bronx zoo require 124 different kinds of food from all parts of the world.

Trans-Canada Air Derby

Race In Spring From Halifax To Vancouver Suggested

An international air race across Canada with a real pot of gold at the rainbow's end for the winner is proposed by William Templeton, manager of the Vancouver air port.

With a view to drawing attention to the future of aviation in Canada and stimulating interest in a trans-Canada air mail service, Templeton proposed the air derby across the Dominion with the prize a pot brimming with the precious yellow metal mined from the gold fields of British Columbia. A pot of silver would wait the airman finishing second.

The flyer would start from Halifax and follow the route already mapped out for a trans-Canada air mail service. Over the populous industrial and farm districts of Eastern Canada and the rolling wheat fields of the prairies, the airmen would wing their way to the foot-hills of the Rockies. Then they would fly over the towering snow-capped peaks and yawning chasms with their treacherous down-drafts below, to Vancouver, Canada's gateway to the Pacific and the terminus of the race.

Qualified flyers of proven ability would be eligible to compete in the race, thus making it an international classic and possibly attracting some of the greatest names in aviation on the continent.

Aero clubs and aviation men throughout Canada have been canvassed on the proposal, Templeton said, and have enthusiastically agreed it would provide a great impetus to aviation in Canada.

Definite action on the project is expected next spring, the Vancouver air port official concluded. The size of the pot of gold and pot of silver would be matters for discussion.

Silver Dollars For Canada

Will Be Minted To Commemorate King's Accession To Throne

Canada's first silver dollar will be minted and circulated as a commemorative token of the 25th anniversary of King George's accession to the throne on May 6, 1935. It will be called the "George Dollar" and will bear a likeness of His Majesty. The extent of its popularity will determine the amount of currency to be issued in this form but it is understood the first minting will run to at least 100,000.

Only slightly larger in circumference than the 50-cent piece the new coin will be thicker, and, in the opinion of the experts who designed it, fully acceptable from the point of view of convenience of handling, as the smaller coin.

The "George Dollar" will be circulated during the silver jubilee proceedings in London.

Relic Of Past Ages

Interesting Discovery Of Inter-Glacial Period In Saskatchewan

Many thousands of years ago, a beaver or some similar animal cut down a small tree at Candiac, east of Regina. A piece of the wood with the tooth marks still distinct was found in the clay 18 feet below the surface when a well was dug on the farm of John Malach, and has been sent to the department of geology at the University of Saskatchewan.

Professor F. H. Edmunds said that the material was either deposited shortly after the glacial period or in an inter-glacial period. It was an indication that the beaver or some similar animal inhabited the prairies many thousands of years ago. The tooth marks are about one-eighth of an inch broad.

Cattle sales at stockyards during the present year are 15 per cent. in excess of sales during 1933, and, says the Livestock Market Report, the surplus reflects the large number of cattle on farms which have been due to increase in production and accumulation from the previous year.

She: "Did the doctor do anything to hasten your recovery?"

He: "Yes, he told me he would charge \$3 for every treatment."

Millions now enjoy this

NEW FREEDOM FROM COLDS

for FEWER Colds

for SHORTER Colds

If a cold has already developed, use Vicks VapoRub, the mother's standby in treating colds. Just rubbed on each nostril, its timely use helps to prevent many colds—and to throw off colds in their early stages.

These twin aids for fewer and shorter colds give you the basic medication of Vicks Plan for Better Control of Colds—clinically tested by physicians and proved in everyday home use by millions.

(Full details of this unique Plan in each Vicks package)

Not Altogether New

Chinese System Practised Centuries Ago Resembles "New Deal"

How old is President Roosevelt's New Deal? Or any other present day scheme of economics, including matters of relief, farm administration and control of production?

Marco Polo, who travelled across the desert to China nearly 700 years ago and became the friend and aide of the Grand Khan, seems to have found systems in operation which bear striking resemblances to the economics of 1934. Here are some of them culled from the Everyman edition of "The Travels of Marco Polo":

"Paper currency is circulated in every part of the Grand Khan's dominions; nor does any person at any time at the peril of his life refuse to accept it in payment."

"It may certainly be affirmed that the Grand Khan has a more extensive command of treasure than any other sovereign in the universe."

"The Grand Khan distributes large quantities of grain to his subjects. He provides in like manner for their clothing."

"Not a day passes in which there are not distributed 20,000 vessels of rice, millet and panicum. By reason of this admirable and astonishing liberality which the Grand Khan exercises toward the poor, the people all adore him as a divinity."

"In the case of dearth, he furnishes them from his granaries with so much corn as is necessary for their subsistence as well as for the sowing of their land. He also refrains from exacting the usual tribute."

"In like manner if there is a mortality of cattle in any district he makes good the loss to the sufferers. Moreover, he does not demand the tenth of the increase for three years."

"So great indeed is the quantity that if every individual be permitted to search for them, their value would become trifling. Hence fishery is prohibited to all who do not obtain a license."

"No person dare work the silver, gold or ruby mines under pain of death, unless he obtains his majesty's license. These articles cannot be exported without his permission, for he thinks his credit is connected with them and hence he wishes to maintain their high price."

In this respect there does not seem to be anything new under the sun.—St. Thomas Times-Journal.

Surgeon—"You seem to have a lump on your chest that I will have to get rid of."

Cleint—"That should be easy for you, doc. It's my pocketbook."

In an attempt to stop an intruder, a householder threw a large dictionary at him, but without effect. Words failed him.

Of the five thousand women and girls reported missing in London annually, ninety-five per cent. turn up sooner or later.

Methods Used By Authorities To Guard Against The Spread Of Insect Pests At Exhibitions

The outstanding success of Canadian grain growers at international exhibitions, notably at Chicago recently, are not mere matters of chance. They are indeed striking evidence of the care exercised by the farmers themselves in selecting pure seed of the creative and preservative work of the Dominion and Provincial Departments of Agriculture and of the Canadian Seed Growers' Association.

Besides the growing of pure seed, there is the prevention of disease and attacks from insect and other pests. Apart altogether from the well-known results of the efforts of the experts of the Dominion Department of Agriculture in creating the new, sturdy types of grain that have extended Canada's northern frontier for grain growing and mixed farming, some hitherto unknown duties of government officials in preventing and stamping out disease at the leading expositions have just been brought to light at the recent meeting of the Entomological Society of Ontario.

At the World's Grain Exhibition at Regina in 1933 and at all exhibitions of grain and stock the same exacting details, and a similar amount of scientific knowledge must be observed and applied. For example, at the World's Fair at Chicago in 1933 when insect pests and plant diseases were not so well understood by the general public, it was found necessary to destroy the entire collection of exhibits from many countries owing to infestation by insects. But, both at Chicago in 1934 and at Regina in 1933, matters were entirely different. The exhibitors themselves were better informed and the authorities saw to it that these exhibitions were not the meeting place of pests and disease from all parts of the world.

A definite line of procedure is followed in handling, inspecting and sampling exhibits for such an exhibition as the World's Grain Show. The exhibits were first marked by a representative of the exhibition, then passed to an entomological inspector who made a thorough examination, and who in turn passed the exhibit to a plant pathologist. After being passed by the plant pathologist the samples were taken by a seed inspector for the germination and field tests when required. When the samples were drawn, the metal scoop used was disinfected in methyl alcohol after each sample was taken, and in the case of samples for field growing tests, all were dusted before shipment with a mercury preparation under the supervision of a plant pathologist. All exhibits of corn on the cob were superheated to guard against the European corn borer, and further it was necessary for exhibitors from foreign countries to present a bill of health for their exhibits.

The germination and field tests of grain and other exhibits to determine the purity of strain and ensure no substitution of varieties entailed a great deal of work at Regina. This judging was entirely in addition to the judging on physical appearance of the exhibit. This meant that if it were necessary to fumigate or treat any exhibit as a precautionary measure, the fumigant used must not injure the physical appearance of the grain nor affect its germination. Suitable fumigants were evolved after careful and critical experiment by the Cereal Division and the Seed Branch of the Dominion Department of Agriculture in co-operation. The Cereal Division made a physical examination and field germination test of the treated material and checks while the Seed Branch carried out germination tests of the treated and untreated material in accordance with the procedure followed in the Canadian germination tests for commercial seed. Ultimately at the close of the exhibition, all display material not returned to the country of origin was destroyed in the Regina incinerator under the supervision of entomological inspectors and customs officers. Meanwhile, throughout the exhibition both the competitive and display exhibits, as well as the surplus material, were kept under close observation for outbreaks of stored product insects, but no trace of them was found.

More Contact Needed

To Enable Governments Of Empire To Discuss Matters

There will certainly be no lack of subjects to discuss in the preliminary conversations which must prepare the ground for the next Imperial Conference, due to be held in 1936. The King celebrates next year the twenty-fifth anniversary of his accession to the throne. There will be a great gathering of Dominion statesmen in London to take part in the proceedings, and the opportunity no doubt will be taken to discuss informally but all the more usefully, the questions which have arisen since the conclusion of the Ottawa agreements. Experience has shown that these agreements have been of great benefit and have increased the trade both ways between Great Britain and the Dominions at a time when international trade as a whole has been stagnant or even declining. Naturally it has also exposed defects and omissions and has revealed differences of interpretation which call for adjustment at the next conference. Perhaps what has been demonstrated most clearly is the necessity for machinery to ensure more frequent, if possible continuous, contact between the Governments of the Empire, enabling them to discuss each point of difference as it arises and to adjust their policies to constantly changing circumstances. — London Times.

Eating For Health

Food Habits Can Contribute To A Long Life

That prolonging life at its prime is now largely a matter of proper diet and to that extent is something each individual can do for himself, is the lesson from the newest knowledge of nutrition according to Dr. H. C. Sherman, Professor of Chemistry, who affirms that, instead of "digging his grave with his teeth," man can now make his food habits contribute to health and long life.

Man now has "the option of a longer lease of healthier life, of an earlier and longer prime of life, of more buoyant health throughout the whole life-cycle, as the result of taking a larger proportion of the needed calories in the form of the protective foods," Dr. Sherman states. And by protective foods he means milk and its products, fruits, vegetables and eggs.

So long as the world is full of men who would rather listen to a compliment than a criticism, it will also be full of liars.

Grade "A" Medium Eggs

The Egg Market Situation From The Consumers' Standpoint

Canadian housewives, particularly in the larger centres, are passing up a good bargain in not buying more Grade "A" Medium eggs, stated W. A. Brown, chief of the poultry services of the Dominion Department of Agriculture, in commenting on the present egg market situation from the consumer's viewpoint.

Reports coming to Mr. Brown from the various egg inspection offices under his jurisdiction state that the public is buying Grade "A" Large and Grade "A" Pullet eggs freely, but for some reason are neglecting the Grade "A" Medium.

Mr. Brown points out that all Grade "A" eggs are fresh and of good quality, the only difference between Large, Medium and Pullets being in size. The minimum weights per dozen are 24, 22 and 18 ounces respectively. The retail price on Grade "A" Large in Montreal to-day is 45 to 49 cents. On that basis Grade "A" Medium eggs are worth at least 41 cents but they are actually selling at 33 to 36 cents.

Climatic Changes

Recession Of Glaciers Is Advanced As Reason For Drought Conditions

The gradual changes in climate conditions that have brought droughts to Western Canada and parts of the United States may be caused by the recession of glaciers in the Canadian northwest and Alaska. The theory is being studied by a committee of the British Association for the Advancement of Science.

The scientists have found that the warm winds of the Pacific are not only demolishing great ice sheets in the Atlin, B.C., district but are hollowing out a path across northern Canada on their way east. Formerly they were diverted by ice fields in the north. They passed through southern British Columbia to drop their moisture in rain on the Canadian and United States prairies.

Now with less ice each year in the north and no mountains to precipitate their moisture, the winds reach the 9,000-foot ice cap of Greenland. The change, Mr. Cotsworth says, seems to be making Alaska warmer and Greenland colder.

Butter Production Down

November butter production in Saskatchewan was down one per cent. as compared with the output in November of last year, according to a bulletin issued by the department of agriculture. Production was 712,822 pounds as compared with 726,150 pounds in November, 1933.

Plants can be transplanted more successfully from a dry region to one with more moisture than the reverse.

Seeing a dog stretching himself, a boy, aged 5, cried: "Aunty! Do look at Billy yawning with his back legs!"

AEROPLANE LANDS IN THE CENTRE OF PARIS

As part of the program of the recent Aviation Exhibition in the Champs Elysee, Paris, an autogyro, piloted by M. Peoreux, landed outside the Grande Palais to the amazement of a large crowd of people. Here we see the aeroplane on the point of landing in front of the huge building.

Will Sink Shaft Two Miles Into The Earth To Determine What Is Beneath In Lower Stratas

History Of Pioneers

Stones In Old Cemeteries Yield Information That Is Valuable

The Brockville Recorder says for a number of years it has been the hobby (rather patiently endured by their relatives) of two Leeds and Grenville men to make their way into the rural cemeteries of their district in Ontario and at the expense of their clothing, to climb or vault tottering fences, lift fallen or broken stones from the mould and attempt to copy those inscriptions which remain decipherable.

Some very queer things have been discovered in the 70 or more cemeteries that have been visited—strange inscriptions and stranger epitaphs. The result of these labors forms, however, a valuable catalogue of the early residents of this section of Ontario, one of the first to be settled, and thus an invaluable collection of information incapable of duplication.

Tombstone-hunting or graveyard surveying is not, therefore, pure frivolity, like the "scavenger-hunting" that it may be in process of replacing. It represents a serious effort to record genealogical information before it has passed out of existence, and should the practice, or pastime, spread to Canada (where the habitual state of country cemeteries would suggest prompt action), it may be of much value in adding to the store of knowledge concerning the pioneers that is being accumulated.

Not Always Imitative

Woman Invents Device For Finding And Identifying Radio Stations

Nearly all the psychologists agree that the feminine mind is quick and intuitive, but always imitative, never inventive. And now, with the example of Mrs. Richardson of Shepherd's Bush before them, they can guess again, for she has won the first prize at the International Exhibition of Inventions with her device for finding and identifying radio stations. She may puzzle the psychologists, but will surprise nobody who has seen the improvements any woman can make with string, hairpins, match sticks and other simple tools, on the crude man-made gadgets of her own kitchen. But woman still rocks the cradle by hand. — Manchester Sunday Chronicle.

Widows in Korea do not remarry, no matter how young they may be. Even though they have only been married a month, they may not take a second husband.

The answer to the greatest of the remaining geographical mysteries is to be laid bare.

Work will begin soon on the shaft that is to be sunk two miles below earth's surface to determine more exactly the content of earth's core.

The two-mile-deep hole is being dug mainly to prove that Sir James Jeans, world famous British physicist, is wrong in his theory of the nature of the inner earth. It will be dug south of Dinant, near the river Meuse, in France, by Felix Kaisin, the Belgian professor who is undertaking the project. Mining engineers will assist in locating the shaft.

Prof. Kaisin takes issue with Sir James' contention that the centre of earth is a fluid, molten mass. He believes the earth is a solid mass and will continue to revolve in space forever. He explained:

"There is no particular reason why I have chosen Dinant as the site for the excavation, it is merely convenient to my other work."

Prof. Kaisin, who has the chair of geology at the noted University of Louvain, Belgium, is 45 years old, of medium height and has a very long and heavy beard which gives him somewhat the appearance of primitive man. He continued:

"I expect the work to require two full years. There will be no workers actually in the hole because I will utilize a specially built excavating machine of the type used for drilling tunnels. The hole will be approximately five feet in circumference."

Samples of the earth, as the machine brings it to the surface, will be carefully examined by Prof. Kaisin.

The experiment is being financed by the National Scientific Research Fund, of Belgium, and will cost an estimated \$150,000. The fund also financed Piccard's first stratosphere ascension.

Prof. Kaisin has been occupied in solving the problems of earth's inner nature for 25 years and his theory is in direct contrast with that of Sir James Jeans, who declares that the earth's crusts, mountains and depressions are due to the cooling down of the interior of the earth, thus causing the surface to shrink as does an apple skin. On the other hand, says Dr. Kaisin:

"Earth's crust is like the varnish on a globe—just as thin. Geophysically we are to all intents and purposes in the dark. It is rank hearsay to state now what can be found at the centre of the earth."

Professor Kaisin admits it will be a dangerous enterprise but is determined to carry it through despite "the jeers and laughter." He added:

"I intend to go down myself and definitely disprove laboratory scientists' theories. Scientific theories are constantly being disproven and I am convinced we do not know a thing about what is to be found two miles under the strata."

The Kaisin venture recalls that in 1822 John Cleves Symmes, an army officer, petitioned the U.S. Congress for aid in fitting out an expedition into the interior of earth.

He believed earth to be a hollow concentric sphere, with openings at the poles, and the interior to be inhabited. He won considerable support for his theory but failed to get congressional backing.

Developing Air Mail Service

Sir Philip Sassoon, under-secretary for air, in London, announced in the House of Commons the government had under consideration a scheme of imperial airmail development that would provide eventually for air carriage of all first class mail. The plan calls for increased frequency of service and expedition of schedules.

Translations of the Scriptures were made in 11 additional languages last year, according to a London Bible society.

There are now 18,032 ships sailing the seven seas equipped with radio.

Social Security

We are hearing much today about Social Security. It is the popular theme song of politicians and political parties and the football of politics—it is being used freely as vote bait, and with a good measure of success. The idea of security touches the imagination of nearly all groups. There are only a few who have not suffered the consequences of insecurity in the past years especially. The thought of security brings before us a vision of comfort and prosperity. We are not so sure about the "social" part of it but we all have a notion as to what we mean by "security". And with the result that to one it means one thing and to another something else.

The first need then, it would seem, is for a definition of the term "Social Security"—We must keep the two words together because "Security" alone is too indefinite—"Security" may mean safety for a few, or for one only, or for the State. It may mean protection for one group at the expense of another. But when we speak of Social Security, we make it clear that security is to be for all. Social means all. Social Security then, is security for everybody, young and old, rich and poor, wise and foolish, citizen and alien. "Security" means safety. It guarantees freedom from fear or worry. In the sense generally used "Social Security" is guaranteed to every man, woman and child in the country that an adequate living will be provided them as long as they may live. Of course they may have to meet certain conditions as to hours of labor, etc., but providing those conditions are met, under a program of social security the citizen would not have to take thought for the morrow or make any provisions for a rainy day.

To this end much legislation is being advocated, such as: Old age pensions, minimum wage scales, public works projects to give employment and such like, which are all moves in the right direction, except that they do not go far enough to accomplish the end in view, for instance, the legislature of the United States has before it a bill to give each aged person a pension of \$15 per month. Is that security? Will a guarantee of \$15 per month relieve one of worry and make it unnecessary to provide for old age? Our own provincial pension law is better, but still far from adequate. Likewise the American government is providing a public works program to put the unemployed to work at a wage of \$15 per week. Again I ask, is that security?

Will any group of people in this age of advancement and enlightenment consider such a pittance a guarantee of security? The question also arises—if the unemployed must live on \$15 week scale should not the more fortunate also share that standard? Else, where does the "Social" Security come in? By social security, I at least, understand "equal comfort or security for all", and I believe that is how the majority of the people understand it. At any rate, it should guarantee a minimum income to all that would provide a reasonable measure of independence. Most of our present security programs offer the starving man only the possibility of prolonging his misery instead of immediate starva-

tion—He may choose slow starvation.

Of course the great argument against the state providing this security is the cost. Where will the government get the money?" is the first question that is asked. Shall the taxpayer be required to bear still heavier burdens? Nearly one half of the tax levy now goes to pay for past and future wars, which for want of a better term we may call "Territorial Security." When the territorial security of the nation was in danger, the government demanded sufficient money to meet the emergency and got it at high rate of interest. The money spent in the world war would provide an income of \$100 per month for every man, woman and child in the dominion of Canada for 330 years. To this vast fund our tax payers did not hesitate to contribute, and are still contributing. Every cent of it was spent upon the destruction of human lives and prosperity—Now these same taxpayers cannot afford additional taxation to save lives and make this old earth a happier dwelling place, so they say.

But we are not advocating that the taxpayer provide this social security—He has already been victimized too long. Let the government create its own wealth. For a sovereign state to have to borrow its wealth from a group of its citizens seems ridiculous to the man on the street. Why should the great majority of the people be owned by a small minority? Why cannot all the people create wealth as well as the few? If the citizens of a nation have not a right to capitalize its resources, who has? These are questions that must first be dealt with before we can have a social security that will adequately provide for our people. Doles, pensions and work program based on taxation and borrowing will not meet the need. The people of Canada cannot longer afford to give away their wealth from year to year to corporations and monopolies and then borrow it back from them at high rates of interest. Let us rather keep this wealth in the first place and distribute it among ourselves and save the interest. Most of our present insecurity is financial. Solve the financial problem and social security will be easy to accomplish. Ignore it and misery will continue in spite of every experiment that may be tried.

EGG and POULTRY PRODUCERS

LISTEN TO THESE RADIO TALKS

It will be in your interests to listen to the series of radio addresses to be broadcast over Radio Station CFCN, Calgary, each evening from 7:50 to 8:00, excepting Saturdays and Sundays, between now and February 22nd.

Similar talks will be broadcast over an Edmonton Station at a time to be announced over the air.

Tune in and hear why you should register your disapproval of the Compulsory Egg and Poultry Marketing Scheme by voting against it at the forthcoming Poll.

Protect Your Liberty and Livelihood DO NOT FAIL TO REGISTER

Remember that in order to vote you must register—Do it early. Full particulars as to how and when to register and vote may be obtained at your local Post Office.

ATTEND THE POOL MEETINGS

By all means attend the Pool Meetings. Listen to the arguments in favor—but be prepared to ask questions and voice your disapproval if you are not in agreement.

The radio talks will provide you with plenty of arguments in this connection.

WORLD HAPPENINGS BRIEFLY TOLD

Hay may now be imported duty-free from Canada for use in the drouth areas of the United States.

Circumnavigation of the world by air in 114 hours is the latest ambition of Clyde Pangborn, veteran of the long-distance sky lanes.

The government of Bolivia has issued a general mobilization decree which includes the conscripts of the 1936 periods and the reservists of 1911 and 1914.

By strict economy, and without tax increases or salary reductions, Austria has almost balanced its budget. Finance Minister Dr. Karl Buresch announced.

Great Britain and the Dominions have been the first among the nations to emerge from the world depression. Sir Maurice Hankey, secretary of the British cabinet, told the Canadian Club at Ottawa.

Russia is preparing for monthly stratospheric flights during 1935 at a 60,000-foot altitude. Prof. Prokovieff said during a meeting with Prof. August Piccard and Max Cosyns, electrical engineer associated with Piccard.

Gladstone Murray, a Canadian, has been appointed acting program controller of the British Broadcasting Corporation. He replaces Col. Alan Dawney, who has been ordered away on an extended sick leave by his doctor.

Little Journeys In Science

LIGHT WAVES

(By Gordon H. Guest, M.A.)

Science believes that light is due to a succession of wave-pulses produced in the ether by vibrating electrons, which are found in all atoms. Every solid body, if its temperature is above absolute zero (-273 deg. C.) gives off waves of different lengths.

Bodies at low temperatures give off long waves, which are called heat-waves. These waves produce the sensation of warmth, but cannot be seen. As the temperature rises the waves become shorter and shorter. As a general rule, a body does not glow if its temperature is below 525 deg. C. When a solid such as iron or platinum is heated to 525 deg. C., it becomes faintly red. This means that it is producing waves which are short enough to be detected by the human eye. As the temperature of a body rises, it gives off light-waves of shorter and shorter length, along with longer heat-waves. At 900 deg. C. the body changes to cherry red, at 1300 deg. it is white-hot, while at 1400 deg. C., or above it is blue-white in appearance. Beyond this region the waves are invisible and are known as ultra-violet rays. These rays are very useful in the treatment of certain diseases. They penetrate clear fused quartz, which can now be produced commercially, but they are stopped by ordinary window-glass. The infrared rays are also invisible, but their waves are of greater length than those of visible light. X-rays, as well as the rays from radium, have wave-lengths shorter than the ultra-violet. The rays used in wireless telegraphy, known as Hertzian electric waves, are much longer than the other rays.

Some bodies emit light much below 525 C., that is, below the temperature of incandescence. These bodies are known as luminescent and certain organisms such as the firefly and the glow-worm belong to this class of bodies.

When light is produced in a chemical change at a low temperature we have a phenomenon known as chemiluminescence. Changes of this kind are due to the union of the substance with oxygen, and may therefore be also called oxyluminescence. The glowing of phosphorus is an excellent example of chemiluminescence, for it is slow oxidation.

More Honey Produced

Alberta bees worked overtime during the past year, it is indicated in figures of the Alberta agricultural department. In 1934, 1,264,000 pounds of honey were produced, which at 10 cents per pound brought \$128,493 to apiculturists. Last year's production was 1,000,000 pounds valued at nine cents per pound.

There are upward of 100 different commercial explosives in common use.

A man can walk a mile without moving more than a couple of feet.

W. N. U. 2079

Queer Home-Made Clock

Has Celebrated Twentieth Birthday And Keeps Good Time

What must be the most elaborate home-made clock in the world has just celebrated its 20th "birthday" in the home of G. W. Baritrop of Newton, New Zealand.

He completed it after 30 years' work and set it going in 1914. It has kept accurate time ever since.

He made it out of all sorts of odds and ends; bits of old clocks, old tins, bicycle bells, fishing line, an empty can of floor polish filled with lead (as a pendulum bob), strands of wire and scraps of junk.

It tells the minutes, hours, days of the month, state of the moon and the corresponding times of all the chief cities in the world. Mr. Baritrop had never made a clock before—and has never made one since.

As Good As Money

Circus Manager Had To Take Codfish For Tickets

The manager of a circus showing in Sweden was forced to accept codfish instead of money in return for entrance tickets. At one village, when he had put up his tents, he learned that there was a shortage of ready money. He decided to allow the audience to pay in kind, and the box-office accepted codfish for tickets. The only difficulty arose when one of the audience arrived with a seal and asked for change. The manager sold his "takings" to a wholesale market.

FASHION FANCIES

SMARTLY TIED NECKLINE TUNIC DRESS—UPPER SLEEVES CUT IN ONE WITH SHOULDER YOKE—EASILY SEWN!

By Ellen Worth

Here's an ideal tunic dress that will answer so many daytime requirements for you admirably.

It has a most pleasing new tied neckline. And don't you think the sleeves attractive in deep shaped cuff effect?

You may have your way about materials for this charming dress that you'll find so extremely simple to make.

Pebby crepe silk is very fashionable in black, rust, bright blue, red or green and is lovely for this model. It also looks stunning carried out in satin-back crepe, velvet, wool crepe, etc.

Style No. 733 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust. Size 16 requires 4½ yards of 39-inch material with 1½ yards of 35-inch lining for skirt.

Patterns 20c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Enclose 20c extra if you wish a copy of our Fall and Winter Fashion Magazine. Pattern and magazines are mailed post paid.

"How to Make Better Dresses" booklet, a helpful guide to sewing, is obtainable for 20c. Whether you are a beginner or quite adept with the needle, we think it would pay you to obtain a copy.

A Worth-While Bequest

Trust Fund Brings Christmas Cheer To Aged Peoples' Home

I, being mindful that while there are many to remember the child on Christmas Day, there are few who think of the aged and forgotten . . .

Such words were written into her will, before her death 2½ years ago, by Mrs. Caroline McGilvra Burke, pioneer Seattle resident. She provided that \$25,000 be put into a Christmas trust fund for residents of the Kenney home for old folks.

In 1934 the terms of the will were carried out for the first time. The 56 residents of the home celebrated at a dinner. Each received a cheque for \$43.

Taking Unusual Picture

Film Director Plans Movie Of "Valley Of 10,000 Smokes"

The mysterious "Valley of 10,000 smokes," in the Aleutian Islands, where volcanoes blow their hot breath against Arctic winds, will be the object of an ambitious motion picture expedition, Ewing Scott, Hollywood film director, said. "Our expedition will pioneer the use of modern photographic equipment operated by trained specialists. We have four specially designed airplanes at our disposal, and hope to photograph scenes never before viewed by men."

The number of dogs traded in Canada during the 50 weeks of 1934 ended December 13, was 2,870,041, compared with 3,049,526 during the corresponding period of 1933.

Surf water foam is more dangerous to swimmers than is the swirling motion of the waves; every bubble lessens the density of the water.

Every person in Stockholm, Sweden, spent an average of \$10 for movie tickets in the last year.

The SNAPSHOT GUILD

ENLARGEMENTS AS GIFTS

Enlargements make just about perfect gifts for any occasion. Here are two different enlargements from the same snapshot negative; one for Dad's desk at the office and the other for the living room out at Grandma's.

Everything considered, snapshot-like a "magic lantern" or stereopticon. The only difference is that you use a negative film instead of a lantern slide and project the image on light-sensitive paper instead of a silver screen. By masking out the undesired parts of the negative you keep them from reaching the paper. Any photo shop will explain this and other details more fully for you.

These particular "means" are the snapshot negatives from which beautiful enlargements can be made. If you haven't yet experimented with enlargements, now's the time. If you have a darkroom of your own, where you develop and print your own pictures, one of the simple modern enlargers will make it a vastly more fascinating place. But you get practically the same pleasure—and uniformly excellent work—out of enlargements made from your films by any regular photo finisher.

In enlarging a picture you get not only a bigger, more realistic image but the opportunity to select the best part of any negative for magnification. Suppose you have a good negative of the youngsters at play in the sandbox; a picture which their grandparents would be delighted to have, enlarged as a gift. But suppose there's something incongruous—a wash on the line, a lawn mower or anything else that doesn't add a thing to the charm of the view—to the right or left of the children. With an enlargement, that distracting, unnecessary feature can be completely eliminated.

There's nothing complicated or difficult about enlarging. It's exactly

Taking Lessons In Seeing

Women Blind For Years Have Mistaken Ideas About Things

After years of blindness two women have left London eye hospitals, seeing through the eyes of other women—thanks to operations by a brilliant Welsh surgeon. They found that they had to "learn to see". They helped each other. Now they have parted.

One, Mrs. Daphne Muir, wife of Dr. Raydon Muir of Cape Town, has gone to the United States. The other is left in her English home. They were operated on by Dr. Tudor Thomas of Cardiff. Mrs. Muir had not seen for ten years; her fellow-sufferer for 30 years.

When a woman has not seen since she was a child she discovers what mistaken ideas blind person have about the world around them. Her first lessons in seeing take the form of drawings on a blackboard; ships and houses, dogs and cats, flowers and faces are drawn for her. She learns to know what they are.

Next she is asked to fill the details; to put funnels on to a ship or flowers on stems. Then she learns to distinguish the faces of those who come to see her and to see things in focus as a whole.

Comprehensive variety tests conducted at the various Experimental Farms and Stations of the Dominion Department of Agriculture throughout Canada, as well as the tests undertaken by the Cereal Division at the Central Experimental Farm at Ottawa, indicate the varieties of grain which may be regarded as the most reliable for general cultivation, district by district, at the present time.

The recent British Trans-Greenland expedition travelled 1,500 miles by dog sledge, 700 of it over Greenland territory never before traversed by man.

Serum Declared Success

Announcement By Denver Tuberculosis Experts To Be Made

The announcement of the success of a tuberculosis preventive, apparently as simple to administer as small-pox vaccine, is expected to be made soon by Denver tuberculosis experts.

Governor E. C. Johnson disclosed that "human guinea pig" experiments with Colorado convicts, during which the tuberculosis serum was tested, seemingly are a success.

In medical circles there were reports the formal announcement of the results will be made public soon.

Doctors of the National Jewish hospital at Denver, who developed the serum during experiments which took 15 years, adhered to their policy of silence but they indicated to officials at the Colorado prison, where tests were made, that they have no doubt of the success of the preventive.

Two convicts, who gambled their lives in the tests against a chance at freedom, probably will be granted pardons early in January, Governor Johnson said.

These men, Carl Erickson and Mike Schmidt, were first given "shots" of the serum last April. Then millions of tuberculosis bacilli were injected in their blood.

Prison officials said both men are in good health and that they had shown no signs of contracting the disease.

Denver tuberculosis experts said that the injections of the bacilli were sufficient to "impair the health of any ordinary person" and that if the two convicts had not contracted tuberculosis by this time the serum could be considered a success.

Governor Johnson said that in his agreement with the convicts who volunteered for the tests, it was provided the men should gain their freedom when the physicians had completed their experiments.

Finders Were Not Keepers

Rag Picker Peeved Because Lady Wanted Her Hat

As austere a lady as you could imagine was going along First avenue on one of those recent windy days when an atmospheric paroxysm tore her hat right off her head. It must have had the elements of streamlining, for it made a rather noteworthy flight, gaining an altitude of probably fifty feet and covering almost a block in distance. It made a good landing across First Avenue near Fifty-second Street. The lady had been able to keep it in sight, but her pursuit was slow because of the traffic lights, and by the time she had caught up, a ragpicker, or at any rate an old man with a bag who had been investigating trash cans, had the hat and was pulling the feathers off, preparatory, apparently, to stuffing it in his pack. He gave the hat up, but with a sullen air of having been cheated.—The New Yorker.

Just Want Civil Rights

Quebec Woman Explains Why They Are Seeking Vote

Much-needed reforms, not revolution, were the aims of Quebec feminists, expressed by Mrs. Pierre Casgrain, president of the League for Women's Rights, to the public speaking section of the Junior Board of Trade at Montreal.

Mrs. Casgrain explained that women wanted the vote because they were aware it was the surest and most expeditious way to obtain the recognition of their civil rights. She derided the idea that women who took an interest in matters of public concern became unmindful of their domestic obligations. Admitting that suffragettes might have "a little less glamor than social butterflies," she still thought they were just as good mothers and wives.

Prince Edward Island is the only province in Canada showing a reduced value in field crops for 1934 compared with 1933. The estimated value for 1934 is \$8,800,000 dollars, and \$8,411,000 dollars in 1933.

The ancient Egyptians believed themselves to be an indigenous people, free from all foreign admixture, and all the known facts tend to favor their contention.

JOHN VAN GUILDER.

AT 62—IN BED WITH RHEUMATISM

At 65—Working Again

Why worry about rheumatism? This old fellow had it almost as bad as it could be. But he just found the right remedy, stuck to it, and now he's working again—at 65 years of age.

Let him tell you all about it:—"For two years and a half," he writes, "I have suffered from rheumatism. For eighteen months I could not turn over in bed, nor help myself in any way. My legs and feet were swollen and I could not sleep or get any rest until I started taking Kruschen Salts. After taking one bottle, I went about on two canes. I kept on taking it, as I found the pains were leaving me. I have taken six bottles, and now I have started work again. I am 65 years of age, and everybody that knows me says I am a wonder to get on, after what I was."—J. B.

Do you realize what causes rheumatism? Nothing but sharp-edged uric acid crystals which form as the result of sluggish eliminating organs. Kruschen Salts can always be counted upon to clear those painful crystals from the system.

THE TENDERFOOT

By

GEORGE B. RODNEY

Author of "The Coronado Trail", "The Canyon Trail", Etc.

SYNOPSIS

"You've fallen heir to a half-share in plenty of trouble," the lawyer told Gerald Keene. "The Broken Spur has been systematically looting the ranch, and old Joe Carr, your partner, is drinking himself into ruin."

Dad Kane, desert rat and luckless prospector till now is returning to tell Dustin and Spike Goddard, owners of the Broken Spur ranch, who had grubstaked him, of his discovery of a rich gold mine, and shows samples of the ore. He sees Broken Spur men rustling Hour-glass cattle and protests against it.

Spike Goddard and Sam Dustin, fearing the old prospector may tell others the things he has seen as to the branding of Carr's cattle, plot to get him to show them the location of the mine and then to kill him.

Proof of Dustin's cattle stealing activities was accidentally discovered by Stone, who accompanied by Edith Carr was riding fence a long way from the Hour-glass ranch house.

Dustin unexpectedly comes along and seeing them, stops and talks to Edith. He mentions the Soda Springs dispute could be settled by marrying him, and Edith refuses his proposal with remarks that make Dustin furious. He insults Stone, who promptly throws him into pool of water.

Stone tells Crewe, his foreman, about his meeting with Dustin, and is warned that Dustin would kill him if he got the chance. Stone and Crewe go to Seco to send a telegram to Gerald Keene. While at Seco an attempt is made to kill Stone, who proves more than a match for his enemies.

(Now Go On With The Story)

CHAPTER VII.—Continued

"Aye. I struck a regular Easter greetin'. The whole damned ranch was layin' for me! I reckon this time that man Dustin isn't under any false impressions where we stand. Who's this?"

The slatted door to the barroom was nearly torn from its hinges as Hoskins, the telegraph operator, flung it into the bar.

"I'm lookin' for one Duro Stone," he shouted. "Oh! Here you are! I got an answer to your telegram, Stone. That wire you sent to Gerald Keene. I'll send a copy to you later. This man Keene wired a answer. He says: he'll be with you the tenth of next month."

"Fine! . . ." Stone elbowed a man aside and headed for the street and the crowd sucked back from him. The man who could best Sam Dustin, Corse and the pay roll of the Broken Spur was not to be held lightly. With Dustin and Corse his avowed enemies, he was a marked man in Seco. With Frank Crewe at his side he snatched his pony from the tie-rack, they swung into saddle and headed down the street.

Once on the open trail, Crewe demanded and got an explanation. As Stone told him the details the old manager's face stiffened and grew serious.

"There a lot behind this that we don't sabe," he said. "I'm glad this man Keene is comin'."

Neither of them knew that that

message flung abroad in the bar of the Silver Dollar set fire to Dustin. The moment he realized what Hoskins had said he whirled Corse aside and started for the door.

"We'll get back to the Broken Spur as quick as we can," he said. "I've got business to attend to."

He had.

CHAPTER VIII.

The word of that telegram galvanized Sam Dustin into instant life. Once back at the ranch-house at the Broken Spur he hustled Spike Goddard into the office for conference.

"We've got to change our plans a bit," he said. "While I was in the Silver Dollar that man Stone from the Hour-glass came in with Crewe, their foreman. Corse was with me . . ."

"Corse? That damned fool . . ."

Spike burst into a great laugh. "Do you know what happened to Corse and Gray? A whole lot more than you know of must have taken place. Old man Kane saw the two, Gray and Corse at work on Red Water. Well . . . the other day . . ."

And Spike proceeded to give a garbled account that he had got from the negro driver on the wagon. He had not seen a great deal but he had seen the two men lashing each other with the mesquite sticks and the sight set him to talking . . . after he came back to the Broken Spur.

Dustin stopped him with a pale face.

"It was bad enough havin' old man Kane see what Gray and Corse were doin'," he said. "Now you tell me that this man Stone from the Hour-glass saw it too . . ."

"That was some time after Kane saw 'em," said Spike as though that made a difference.

"You damned fool! You know Gray and Corse have got orders to keep as far away from the ranch as they can and to gather in all the cattle they could find. You know we gave them the wagon so they could keep far out and not implicate us. Looks to me like you've lost your mind, Spike. Hell bells, man!"

"You didn't hear me right," said Spike. "Listen to this . . ."

And between gales of laughter Spike told Dustin anew what had taken place that day on the open range. To his astonishment Dustin did not laugh.

"Don't you think it's funny?" demanded Spike.

"It's almost as funny as an earache. You poor fool! Can't I make it clear to you? Don't you see that Stone knows now as much about the crooked work on the cattle as Kane did? Do you happen to know what happens to men caught with the goods for rustlin'? Good God! Can't you see a thing like this? If Carr finds out what Stone, his hired man, and old Dad Kane knows, he can haul us all into court. If he does that, their evidence will . . ."

He shivered a little at thought of what that evidence could do. "You'll look good danglin' at the loose end of a rope."

At last Spike Goddard "saw". He stood wordless, licking his lips as he always did when perplexed.

"Well . . ." he said finally, "I expect maybe you're right. Mostly you are . . . What'll we do then . . .?"

"We'll have to fire Corse and Gray and let 'em move right on, and that'll take some money. They've got to see that if they talk we'll tell all we know. For the rest . . . we'll do exactly what I planned. We'll have old Dad Kane show us that location and then he'll have to disappear."

For just a moment, even while he talked, Sam Dustin knew cold fear. Every dollar that he owned in the world was invested in his fortunes at the Broken Spur. Common sense told him to sell what he owned at any cost and leave at once if he wished to save his skin . . . He dared not face a hazard of new fortunes with empty hands. A week ago all looked well. They were gathering in cattle from every little crooked canon too distant for the few men of the Hour-glass to range. A week ago his future held a very different outlook. No. . . . This damned man Stone's appearance had put a spoke in his wheel. Spike must have sensed his thoughts.

"How about this man Stone?" he demanded.

"Leave Corse and Gray to tend to him," said Dustin grimly. "Our big

game is what Kane found. Once we get that, we own the Hour-glass. Once we own the Hour-glass . . ."

He licked his lips at the thought of how easily Edith would come to him to save her father. "Listen, Spike . . ."

To-night Hoskins, the telegraph-man, came in to the Silver Dollar. You know Gerald Keene owns half the Hour-glass. He's comin' here. Hoskins ran into the Silver Dollar and told Stone that he had a wire from Gerald Keene. He'll be down here on the tenth . . . That gives us just seventeen days . . ."

"To do what?"

"Good God! Haven't I been telling you? Joe Carr owns half the Hour-glass. This man Gerald Keene owns the other half. If Keene dies, old Carr owns the whole ranch. I've got notes from Carr . . . I bought them from men he borrowed money from in Seco and he gave his share of the Hour-glass as security. Don't you see now? If Gerald Keene dies, old Carr passes on the whole ranch to pay for his notes . . . See now?"

"I . . . I'm beginnin' to," said Spike dazedly. "We'd git the whole of the Hour-glass and the gold-mine that old man Kane found . . ."

"And I'll get Edith," said Dustin quietly. "I'll get Edith. She'll be damned glad to marry me to keep her old man out o' the poor-house. See?"

"By God," said Spike admiringly. "If I didn't know you so well, Sam, I'd say you was crooked." Then he snickered. If there was one thing of which Spike Goddard was sure, it was that no power under Heaven could induce pretty Edith Carr to have any dealings with his partner. But it was hard to keep from laughing at thought of it. Sam was so darned sure of himself where women were concerned.

"I bet you two drinks she turns you down on any account," he said. "Shucks, man! What do you want to buy a roan heifer like her fer?"

"You fool," said Dustin. "Haven't you ever broken a horse that fought you? It didn't make any special difference about that horse. There was fifty better in the remuda but you wanted to break that one because it fought you. You just made up your mind you'd break that horse to hand or bust. Know that feelin'?"

Spike nodded soberly. He knew exactly that feeling. Dustin went on.

"You send Peyot Gregg in to me," he said. "I need him in this."

In ten minutes Peyot Gregg shambled into the room. Peyot was a fixture at the Broken Spur just as a boar used to be a fixture at the Court of Charles of Burgundy or a fool at Feudal boards. He was a huge bulk of a man, making up in thaws what he lacked in brains. His low brows, his deep-set eyes that alternately gleamed and glowed cavernously, his loose-lipped mouth, all told a story that is not rare enough in the West. The man was a victim of that dread drug that has pulled down so many men. . . . Peyot!

He was as strong as steel yet slackness was apparent, too. It was written all over him. Dustin's great hand snatched at him and almost hurled him into a corner.

"You've been smokin' that damned dope again," he said fiercely. "I've told you a dozen times to lay off it unless you get it from me. I swear to God, Peyot, some day I'll kill you if you don't obey my orders."

"I been mindin' 'em for five years now," croaked Peyot. "What you want, Mist' Dustin?"

"You get packs made up for the mornin'," said Dustin. "I'm goin' into the hills for a few days and you're to go along. Just you and me and old man Kane. Get two pack-ponies, too. . . . No. Better use old man Kane's burros. They're pretty slow but they pack better and they know the trail, too. Use the pack-burros. Understand?"

Peyot nodded wordlessly and disappeared, and Dustin stared after him as he slunk out of the room. There is no other word to adequately express it: he simply faded away as a coyote merges into the shadows of the desert.

For more than five years Peyot had been a fixture at the Broken Spur. Where he originally came from no one knew or cared. The bunk-house accepted him as it accepted lice or sand-burrs in their

Your Refrigerator Needs Help

Even in refrigerators foods often lose their original flavor, moisture, or crispness. Complete protection of both flavor and freshness is easily secured by wrapping food in Para-Sani waxed paper. Just tear off what you need against the sharp edge of the box.

For less exacting uses "Centre Pull" Waxed Paper in envelopes is very popular.

Both kinds are sold by grocers, druggists and stationers.

Appleford Paper Products Ltd., HAMILTON, ONT.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

that a man must be removed is one thing; to effect that removal is another. From time to time his eyes strayed to Peyot for, after all, Peyot was the key to his plan.

(To Be Continued)

Little Helps For This Week

"Thou shalt worship the Lord thy God, and Him only shalt thou serve." Matthew 4:10.

The comfort of a mind at rest From every care Thou hast not blest; A heart from all the world set free, To worship and to wait on Thee.

Resign every forbidden joy; restrain every wish that is not referred to His will; banish all eager desires and anxiety. Desire only the will of God, seek Him alone, and thou shalt find peace.

I have been a great deal happier since I have given up thinking of what's easy and pleasant, and being discontented because I cannot have my own will. Our life is determined for us, and it makes the mind very free when we give up wishing, and only think of bearing what is laid upon us, and doing what is given us to do.—George Eliot.

New Revelation In Science

Microbes Carried Across Atlantic By Winds Of The Upper Air

Col. Charles A. Lindbergh was revealed recently as a new pioneer in science—the first man to gather proof that microscopic bacteria, fungus spores and pollens, including some diseases, are carried all the way across the north Atlantic by winds of the upper air.

The flyer collected these tiny forms of life at many points high over northern waters during the flight he and Mrs. Lindbergh made across the north Atlantic in the summer of 1933.

The discovery by Col. Lindbergh is believed by scientists to be of great importance in showing how both disease organisms and others that are beneficial can be transported alive over long distance by air currents high above the ground barriers.

Among the organisms Col. Lindbergh collected were: Several kinds of fungi which cause rust and smut diseases of crops; others that cause early blight of potatoes and apple scab and other blights that attack crops, and several that cause decay of wood. Many others were found that have not yet been identified.

An American film actress was applying for a passport.

"Unmarried?" she was asked.

"Occasionally," she answered.

Burnside Notes.

Stuart school dramatic society will hold a box social at the school on Feb 13th

Lone Pine W.I. will meet at home of Mrs C R Liesemer on February 14th.

Mrs Otto Bittner spent Saturday afternoon with Mrs N Eckel.

Mr and Mrs Joe Clark, spent Sunday afternoon with Mr. and Mrs. Fred Thompson.

Mr. and Mr. Clarence Cipperley spent Sunday at the Jenkins' home.

Mr and Mrs Chris Ehret and family spent Sunday evening with Mr and Mrs Neil Gill

Mr Sam McAllister was a Sunday afternoon visitor at the home of Mr Bruce Sheils

Bill Wulawka spent Sunday at Robert Eckel's home

Mr Don Grace is helping Mr Hugh McLean for a couple of weeks

Mr. George Metz has gone to Edmonton to attend the trustee's convention as a delegate from Burnside School District

Miss Zook of Sunnyslope spent the weekend with Miss Alberta Metz. Miss Metz and her guest Monday afternoon with Mrs P Gobert

Mr and Mrs Bert Pross, Helen, Howard, Lester and Roger Pross and Happy Wall visited Mr and Mrs D M Morrison at Coburn on Sunday

WEEKLY SERMONETTE

"It is better to think a lot ABOUT yourself, than to think a lot OF yourself."

The Boys' Band is arranging to give a concert in the Didsbury Opera House on Friday, February 22nd — Be sure and keep that date open.

Melvin Notes

Go-Getters are holding a dance in the Melvin School Friday, Feb. 8th. Halliday's Orchestra.

The Annual Meeting of the Melvin School District was well attended last Saturday afternoon. Mr. W. Summers was elected to succeed Mr. A. Wahl, the retiring trustee, and Mr. R. McNaughton succeeds Mr. C. Youngs, who had resigned. Both Mr. Wahl and Mr. Youngs have served long and well on the school board and we extend to them our hearty appreciation of their services.

The Go-Getters held their annual business meeting Tuesday evening, and it was well attended. Mrs. A. Krebs was elected president and Mr. Sid Summers vice-president; Geo Youngs, secretary-treasurer; Sid Summers and Ross Youngs, sports committee; Mrs. Emil Krebs, lunch committee; Mrs. Godfrey Carlson press reporter. The club decided to hold club meetings and whist drives on alternate Tuesday evenings. February 12 will be the first whist drive. Will ladies please bring a little lunch.

Much sympathy is extended to Mr. and Mrs. Peter Johnston and family on account of the death of Mr. Johnston's nephew William, son of Mr. Thomas Johnston of Orkney, Alta. Mr. and Mrs. Johnston and Ranold attended the funeral which was held on Tuesday.

It is a good idea while parking your car in Calgary to leave the door unlocked as it will save unknown parties the trouble of cutting out the window in order to steal the contents.

Mrs. Jim Adam and Janet of Springside spent Thursday with Mr. and Mrs. C. Youngs.

Miss Audrey Hosegood is spending the week with Miss Marion Johnston.

Mr. Cunningham of Didsbury is making a great improvement on Mr. Roy McNaughton's house these days.

Mr. and Mrs. Leeson and Carlton and Mrs. Chas Youngs and Dorothy spent Sunday at the home of Mr. and Mrs. Bruce Parker.

Misses Dorothy Youngs and Hazel Ray accompanied by Mrs. Geo Youngs, Maude Johnston and Ivy Jackson visited the southern city Saturday.

Elkton Notes.

Elkton Social Credit Group held a whist drive in the Elkton school on Monday evening. About sixty were present to enjoy a most pleasant evening. Proceeds of the drive were forwarded to the Social Credit League.

Mountain View Notes

Miss D Brown spent the week in Calgary.

A lecture on Social Credit was ably given by Mr Laing, who, as well as giving a clear outline of the system, emphasized the necessity of studying the subject in one's leisure time. At the close Mr Lloyd Hehn who acted as chairman gave the speaker a hearty vote of thanks for his lecture. Following this a Social Credit Study Group was formed. Mr Ed Liesemer was nominated as president but he in turn nominated Mr H Roberts to stand who was elected. However, Mr Liesemer was unanimously chosen as vice-president and Mr E Atkinson as secretary.

The Group will meet in Community Hall on Monday evening, Feb 11.

We are pleased to hear Baby Roberts is home again and hope he keeps on steadily improving in health.

In Memoriam.

MARGARET PRATT—Who died February 6, 1934:

I have only your memory, dear Maggie,
To remember my whole life through,
But the sweetness will linger for ever
As I cherish sweet memories of you
Lovingly remembered by Mother.
